Why us?

EXPERIENCE

Practical German expertise in furniture component production, continued in Poland for over a decade.]

PRODUCT DEVELOPMENT

Continuous pursuit of product improvement and its production process. Constant search for new and unique materials.

IDEAS

A wide international sales network and a well-thought-out materials choices are a source of inspiration and experience regarding products, interior trends, marketing and sales strategies.

POLISH MARKET PRESENCE

Due to our warehouse and production facility in Poland, we ideally connect the German "know-how" with the Polish tenacity and flexibility which is critical in the market.

ECO-AWARENESS

With regard to the environment and its care, we have successfully implemented pro-ecological changes in our organization, facility operations, and have expanded our product offer to include recycled products.

ACRYLUX

Boards covered with high gloss ABS/PMMA 0.7 - 0.8 mm laminate, which ensures high resistance to scratches, mechanical damage, chemical agents and UV radiation. Back of the board - white HIPS balancing laminate.

DIMENSIONS: 2800 × 1300 mm

THICKNESS: 19 mm (Premium/Eco) 18 mm (HIPS)
6-48 mm to order

BASE: MDF, chipboard by request

ACRYLUX MATTE ANTI - FINGERPRINT

Boards covered with ABS / PMMA laminate with a thickness of 0.5 mm in a supermatte finish. The laminate is factory hardened, which ensures high resistance to scratches, "fingerprints", chemical agents and UV radiation. Back side - white melamine or white paint. Double-sided lamination is available.

DIMENSIONS: 2800 × 1300 mm

THICKNESS: 18,5 mm (Premium/Eco) 18 mm (HIPS)
6-48 mm to order

BASE: MDF, chipboard by request

BASE: MDF, chipboard by request

ACRYLUX 0.5

Board covered with high gloss ABS/PMMA 0.5 mm laminate. Perfectly smooth surface and standard scratch resistance. Back side - white melamine, white paint or HIPS laminate.

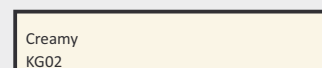

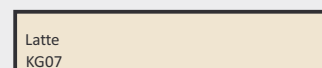

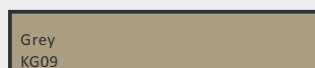

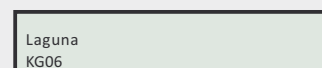

DIMENSIONS: 2800 × 1300 mm

THICKNESS:
18,5 mm (Premium/Eco)
18 mm (HIPS), 6-48 mm by request

BASE: MDF, chipboard by request

KRISTALL

The best surface quality of acrylic boards. The material gives the surface the depth of glass yet ensures convenience and safety during processing (shatter-proof). Kristall fronts, compared to glass fronts, are much lighter, safer and can be processed with traditional tools. Available in gloss and matte finish (Kristall Satina).

DIMENSIONS: 2800 × 1300 mm

THICKNESS: 19 mm

BASE: MDF

NEW COLLECTION ECOLOGICAL PANELS

ITALIAN DESIGN 100% recycled wood

Economically and ecologically
sustainable production process

Ecological boards meet the same standards as wooden boards.

Post-consumer wood products, such as old furniture, wooden chairs and pallets are utilized in the production of new ecological furniture boards.

The central concept of ecological furniture board production is the recycling of once-used wooden materials, from products like old furniture or pallets. This ensures that new furniture production can continue without the introduction of new wood stock from cutting trees.

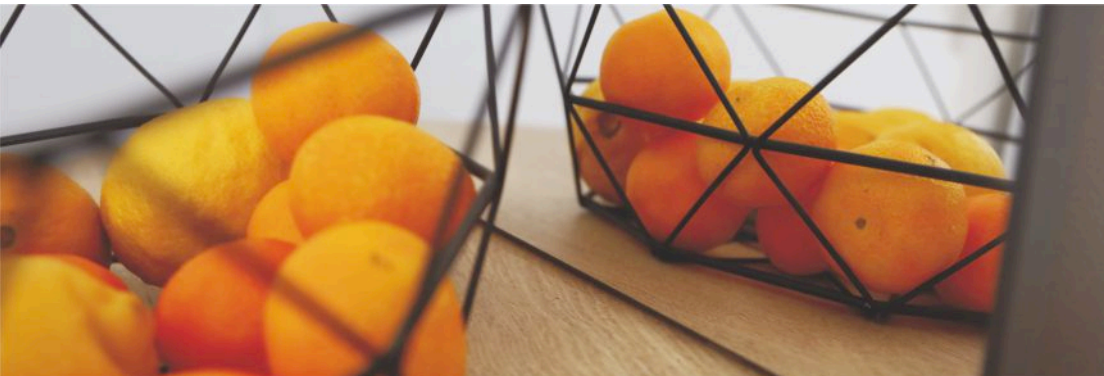

The production of ecological boards is part of an integrated and repeatable cycle, beginning with the collection of used materials, and ending with a new, functional product. The process is so thorough in its approach, even those materials that can't be recycled in the manufacturing process are used in the production of green energy, for heat and electricity, as biomass to power the whole process.

- warehouse offer, **available from 1 panel**
- Possibility to order ready made (cut and edged) cabinet doors
- By request - **boards with fire resistance certificates**

MIRROR

MDF board is covered with a 1 mm thick, mirror-like, shatterproof laminate. The back of the board is finished with a 1mm thick balancing laminate. The product is easier and safer to work with when compared to a traditional mirror, making it suitable for public places and exhibitions.

**Safe solution
for public places**

TEXTURE

ONYX

A stone-like slab with shiny particles and an uneven, varied surface.

- The perfect solution for both large and small spaces
- Cheaper and easier to process, easier to use, and does not require time-consuming cleaning and impregnation, as opposed to its natural counterpart
- Increased resistance to moisture due to the use of HIPS laminate

BRUSHED STEEL

Imitation metal boards. Light, easy to process, and resistant against scratching. Our offer also includes perfectly matched edgebanding in color and texture.

NEW

Composed of the most popular decors of this season. This offer combines attractive styles with a wealth of surface finish choices. In this collection, you will find products in matte, high gloss, mono-colored, wood-like, and even metal decors.

HIGH GLOSS

Melamine MDF or chipboard laminated with a 75µ thick transparent PET in film in gloss. Measured reflectivity of >85 gloss units. Outer layer is resistant against scratching, chemical agents, and UV radiation. Does not require special products for maintenance. Board backing – color matched melamine.

MATTE

Melamine MDF or chipboard laminated with a 75µ thick transparent PET in film in matte. Measured reflectivity of <15 gloss units. AS opposed to conventional matte boards available on the market, the surface has a characteristic satin touch and feel. Board backing – color matched melamine.

THICKNESS: 18 mm

EDGE-BANDING: 23 mm x 1 mm

BASE: MDF, *chipboard

METAL

MDF boards laminated with a PET film with an additional metal layer. Three metal decors are available in two different surfaces finishes – smooth and crumble, which provides a “hammered” look.

THICKNESS: 18 mm

EDGE-BANDING: 23 mm x 1 mm

BASE: MDF

GREEN

An innovative product combining chipboard from 100% recycled wood with transparent lamination. Boards are covered with melamine and laminated with a PET film in high gloss or matte. Panel backing – color matched melamine.

THICKNESS: 18 mm

EDGE-BANDING: 23 mm x 1 mm

BASE: chipboard
